Shaping a World of Trust

# ISO 14001: 2026 ENVIRONMENT MANAGEMENT SYSTEM AWARENESS

**Course Overview**

This 1-day ISO 14001:2026 Environment Management System Awareness training is designed to provide participants with a practical understanding of the Environmental Management System (EMS) requirements and the key changes and expectations introduced in the ISO 14001:2026 update. The course focuses on environmental responsibilities, compliance obligations, risk-based thinking, life-cycle perspective, and the role employees play in supporting environmental objectives. It is suitable for all levels of staff who need awareness of ISO 14001 and how it supports sustainability, regulatory compliance, and continual environmental performance improvement.

**Learning Objectives**

At the end of the course, you will be able to:

- Understand the purpose and benefits of ISO 14001.
- Recognize key concepts, principles, and terminology.
- Identify the structure of the ISO 14001 standard.
- Understand the requirements of ISO 14001 clauses.
- Appreciate the importance of life-cycle perspective and environmental performance
- Support the organization's environmental policy, objectives, and continual improvement efforts

**Benefits of the Course**

- Raises awareness of environmental responsibilities across all levels of the organization.
- Helps reduce environmental risks, incidents, and non-compliance through better understanding of controls and procedures.
- Supports improved resource efficiency, waste reduction, and cost savings linked to better environmental performance.
- Enhances organizational reputation and stakeholder confidence by demonstrating commitment to environmental management.
- Encourages a culture of continual improvement and employee engagement in sustainability initiatives.

**Duration of training**

1 day

**Language**

English

Shaping a World of Trust

**Who Should Attend**

- Environmental, Health & Safety (EHS) professionals and officers
- Quality managers and internal auditors involved in management systems
- Management representatives and top-management personnel overseeing EMS
- Members of the ISO 14001 implementation or project team
- Employees responsible for environmental compliance, legal-requirement updates, and monitoring
- Supervisors and team leaders who need to understand their role in the EMS
- All employees (in broader awareness sessions) to foster organization-wide environmental responsibility

**Prerequisite for Participant**

Participants are expected to have a basic understanding of the organization's operations and environmental aspects, along with a willingness to learn about environmental management concepts and their application to their respective roles.

**Learning Methodology**

This course is highly interactive and utilizes methodology including group discussions, case studies, participant presentations, and group & individual challenges (if applicable).

**Course Certification**

Participants will be issued with a certificate of attendance.

**Additional Information**
